receiving indication of a state change for a first resource;

transmitting the indication of the state change of the first resource to a

second resource dependent on the first resource; and

receiving indication of a state change of the second resource.

43.    *(Amended)* A system for managing dependencies in a component-

based system comprising:

means for receiving indication of a state change for a first resource;

means for transmitting the indication of the state change of the first

resource to a second resource dependent on the first resource; and

means for receiving indication of a state change of the second resource.

47.    *(Amended)* A computer readable medium, the computer readable

medium storing computer readable code executable to perform a method for

managing a component-based system comprising:

receiving indication of a state change for a first resource;

transmitting the indication of the state change of the first resource to a

second resource dependent on the first resource; and

receiving indication of a state change of the second resource.

## CONCLUSION

The specification and claims were amended to correct minor,

typographical errors. Thus, Applicants respectfully submit that no new matter

has been added.
